MOBILE Defined by HIP 53 Updated by HIP 75 *Rewardable percentage at the start of the subDAO is below 100% because not all entities that receive rewards according to the subDAO emission schedule will exist at that point in time. Once rewardable entities that are missing go live, the rewardable percentage share will increase according to the rewards share they receive. The increase is not scheduled to a specific date but assumed to hit 100% before Solana Migration happens on April 18th, first 24 hour epoch starts 19th April 00:00:00 UTC The Helium Emissions Year is Aug1-Aug1 so Leap years start Aug in the year before.
